P0123	9501015187740l	FCDB	Payroll Maker	Initiator	MK_002	Pay Roll Maker Group	Batch Payment	BPR	CSV File but set limit 10k <= & >= 1k

- The above tables show the dummy data set up for business banking Basically Rule are setting up in two types Individual and Groups.
- For individual Transaction (Trnx) Initiator and Authorizer no need to setup limit and can be assigned for all Transaction types
- For Grouping case both Initiator and Authorizer set Limit for Transaction amount and Transaction Types
  - Example for Rule P0123 In Group having three transaction Initiators each of them can be restricted by Transaction Types or restricted by transaction record amount (and also can be allowed for all transaction types base on the organization structure. For Authorizer restricted by amount limit and transaction types and rule ID authorizer must be under the same rules.
